

SENSENE™ Neo

DISCOVER SENSENE™ NEO

The Next Generation of SENSENE™ Solvent

Introducing SENSENE™ Neo, the evolution of the well-known dry cleaning solvent SENSENE™. Formulated with the same core components, SENSENE™ Neo provides reliable cleaning results while offering numerous benefits designed to meet modern environmental and operational standards.

KEY BENEFITS OF SENSENE™ NEO

SENSE FOR BEAUTY

Cleaning tests show that SENSENE™ Neo delivers very good cleaning results, comparable to SENSENE™ in most cleaning scenarios.

SENSE FOR NATURE

Being a modified alcohol based formulation, SENSENE™ Neo is inherently biodegradable and has low aquatic toxicity, making it a responsible choice for environmentally conscious businesses.

SENSE FOR TOUCH

SENSENE™ Neo is even more gentle on fabrics while maintaining the efficiency dry cleaners expect.

SENSE FOR BUSINESS

Not only is SENSENE™ Neo a more economic solution, it also has a higher flashpoint of $\geq 61^{\circ}\text{C}$, enabling more operational flexibility. It can be used in multi-solvent machines already set up for SENSENE™.

SENSE FOR SCENT

SENSENE™ Neo leaves textiles with a more pleasant, fresh scent after cleaning.

COMPATIBILITY WITH CARE LABELLING STANDARDS

SENSENE™ Neo (like SENSENE™) is not yet part of the Care Labelling Standard ISO 3758. However, industry experience shows that it can comply with the two established cleaning processes:

- **P** normal cleaning process without any restrictions
- **F** gentle cleaning process for delicate garments

NOTE: Certain restrictions concerning temperature, humidity and mechanics may apply in the process. We recommend testing on a concealed part of the garment before full cleaning. Dry cleaners should also consider the textile type and the degree of soiling when deciding on the cleaning process.

CONTACT US TO LEARN MORE

Talk to us to learn how SENSENE™ Neo can enhance your cleaning results, increase customer satisfaction and reduce your environmental impact.

As machine models and features differ, we recommend consulting your machine manufacturer when considering the use of SENSENE™ Neo. Both SENSENE™ Neo and SENSENE™ remain available through SAFECEM's global and local distribution network, offering dry cleaners the flexibility to choose the solution best suited to their needs.
