

CHEMAWARE™ Smart Services – an App for Simplified Cleaning Process Monitoring, Increased Reliability and Higher Efficiency

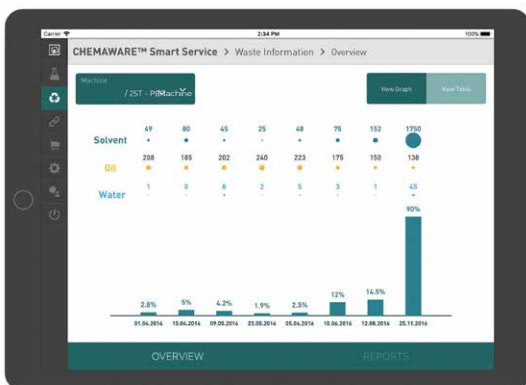

CHEMAWARE™ Smart Services is the latest development of the CHEMAWARE™ Knowledge platform. The tablet-based app is in line with the current evolution towards “industry 4.0” and radically simplifies the monitoring and maintenance of the cleaning media. This central service element helps customers monitor important aspects of the cleaning process easily and quickly.

The innovative CHEMAWARE™ Smart Service – combining both hardware and software – enables users to access the relevant data to monitor the cleaning process. The hardware (tablet)

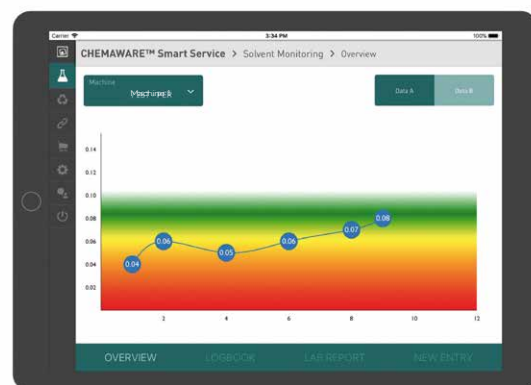

comes with fixture accessories so it can be installed close to where it is required i.e. at the machine location.

The CHEMAWARE™ Smart Services App contains a number of important process monitoring tools:

CHEMAWARE™ Logbook with recommendations on stabilization; waste information which can be filtered by machine; COMPLEASE™ portal enabling user access to consumption figures plus the ability to request product delivery; and finally, automatic reminders on solvent testing or CHEMAWARE™ Solvent Analyses.

Your waste information at one glance

Solvent monitoring made easy

What are the benefits?

CHEMWARE™ Smart Services simplifies your work and the work of your team. It compiles the main monitoring tools in one place and digitalizes them in one single user-friendly platform. Since it also enables users to review and track previous activities for quality purposes, it is also designed to minimize mistakes and in turn increase process reliability.

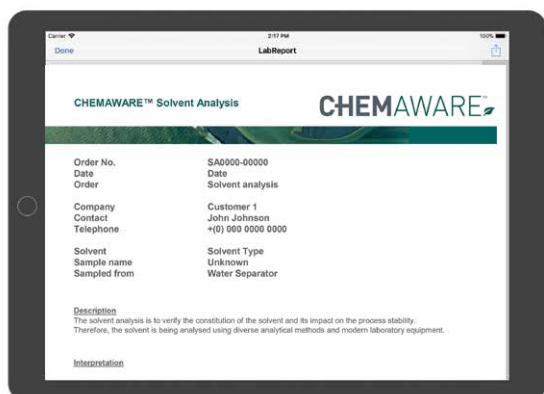

Finally, CHEMWARE™ Smart Services saves you time, for example, by allowing you to request products and services via direct web-based ordering; to verify that solvent has been tested or to simply find your contact person – making the search for information at different places a thing of the past.

In short, CHEMWARE™ Smart Services improves process efficiency.

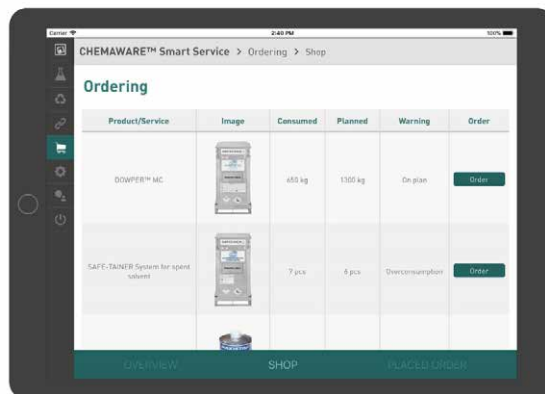

How do I get it?

CHEMWARE™ Smart Services is a part of the innovative COMPLEASE™ Chemical Leasing package. Included within the monthly rate are: hardware (iPad), fixation accessories, software, data connection (if necessary) and a unique end user access password.

CHEMWARE™ Smart Services provides user-friendly tracking of the cleaning process. It enhances collaboration to deliver recommendations and consultancy, helping you and your team to maintain performance and reliability.
